

## *Small chiller – big effect*

# NANO LINE

With the small but robust stand-alone chillers from the Nano-Line, KKT chillers takes the heat off your industrial cooling needs. The easy-to-read level indicator reliably indicates the min. and max. levels of the coolant. Preassembled lifting lugs ensure easy transport. Equipped with a programmable control module, every nBoxX enables high temperature stability of the cooling medium. Therefore, the chillers of the Nano-Line represent the all-round solution for a large variety of applications in the 1.9 - 7.0 kW power range.

## BASIC CONFIGURATION

- + **Overflow valve** for free adjustment of the pressure in the water circuit
- + **Tank level switch** for monitoring the water level in the tank and dry running protection of the pump.
- + **Flow switch** – adjustable flow monitoring (minimum permissible flow)
- + **Error indication** on the display
- + **Temperature difference control** – freely adjustable flow temperature via display
- + **Wire labeling**
- + **Potential-free contact** for collective fault message

## OPTIONS

- + **Hot gas bypass** to improve the temperature accuracy to  $\pm 1\text{K}$
- + **Aluminium air filter kit**
- + **Castors**
- + **Contact for remote control**
